

INSTITUTIONAL BROCHURE

TPC GROUP

Industrial welding systems, high-efficiency compressed air setups, technical supplies, and premium certified pre-owned workshop equipment.

Published Date: March 2026

Headquarters: Bibbiena (AR), Tuscany, Italy

About TPC Group

Founded in 1974, TPC Group has spent 50 years acting as an industry champion in industrial welding engineering, high-efficiency air compressing plants, and technical services.

With a constant focus on technological innovation, we integrate state-of-the-art machinery with smart data management utilities to guarantee direct Industry 4.0 interconnectivity.

The 4 Core Operating Divisions

1. Industrial Welding Solutions

High-tech Fronius welding systems, modular workshop automation, turn-key robotic integration, and EN 60974-14 validation support.

2. Compressed Air Engineering

Custom design and assembly of rotary screw Power System packages utilizing variable speed technologies to enforce maximum energy savings.

3. Consumables & Genuine Parts

Premium filler alloys, torches, personal protective safety equipment, and original factory spare parts to secure plant uptime.

4. Certified Pre-Owned Equipment

Heavy industrial machinery and tool units, thoroughly serviced, validated, and backed by our dedicated technician force.

Fifty Years of Tuscan Engineering Heritage

From 1974 to 2024: TPC Group supports leading manufacturing companies and metallurgy experts, seamlessly combining mechanical tradition with digital tracking.

Strategic Non-EU Target Markets

Backed by funding from the Tuscany Region,TPC Group initiated structured expansion projects directed toward two highly complementary non-EU markets, aiming to plant smart engineering solutions and form stable international partnerships.

UNITED KINGDOM (UK)

HIGH-VALUE QUALITY MARKET

- High-tech industrial sectors (aerospace, automotive, defense, structural).
- Strong focus on data tracing and IoT parameters (utilizing Fronius WeldCube setups).
- Compliance guidance adapting post-Brexit structures (new UKCA standards).

TURKEY (TR)

GLOBAL MANUFACTURING HUB

- One of Europe's primary hubs for heavy steel fabrication and metallurgy.
- Critical focus on energy performance (implementing variable speed compressor plants).
- Strategic coordination with prominent Turkish machinery manufacturers.
